Suntech Selected to Deliver Solar Panels for Taiwan's Largest Solar Power Plant

Citing the reliability and high-efficiency of our solar modules, Taiwan Power Co. selected Suntech to supply solar panels for the island's largest solar power plant. With a capacity of 4.7MW, the new solar power plant will be located in Kaohsiung County. The solar power plant is scheduled to begin commercial operation early next year...[read more](#)

Suntech Cleans Up China's Oldest Power Plant

Following the construction of the China Pavilion and Theme Pavilion, both of which feature advanced Suntech solar systems, another iconic venue has been developed through the renovation of the former Nanshi power plant, the oldest-standing power plant in China. As the primary supplier, Suntech delivered 40% of the solar panels for the installation, which features both 160kW high-efficiency monocrystalline modules used as well as 40kW thin-film modules ...[read more](#)

Suntech Brings Solar Power to Harrah's Rincon Casino

On March 24th, Suntech completed a 1MWp solar installation for Harrah's Rincon Casino, a top resort-gaming destination. The system will offset nearly a quarter of the Casino's total energy consumption and is part of Harrah's ongoing conservation and sustainability efforts... [read more](#)

Suntech's First Commercial, Grid Connected Thin-Film Solar Installation Debuts in Xian

On January 19th, a 13.12kWp commercial, grid-connected solar system was completed for Applied Materials at one of the company's factories in Xian. This is the first time that Suntech's 5.72 square metres thin-film modules have been used in a commercial solar installation.

Suntech Testing Lab Received Accreditation from the China National Accreditation Service for Conformity Assessment (CNAS)

On March 2nd, Suntech's state-of-the-art quality testing center in Wuxi received a third prestigious accreditation – this time from the China National Accreditation Service (CNAS). In June 2009, Suntech's Quality Lab became the first in China to be awarded the Underwriters Laboratories Witness Testing Data Program certificate. Six months later, the solar facility became the first in Asia to be awarded the VDE Test Data Acceptance Program (TDAP) certificate ...[read more](#)

Upcoming Events
